

To Whom it may concern:

As a subscriber to XM radio I ask you to soundly defeat the NAB Petition 04-160.

The reason I ask you to do this is because first and foremost, I pay for the programming that is available on the radio. Asd a long haul trucker it is very important to me to have some knowlege of the weather and road conditions that I face as a driver for my safety as well as the safety of the general motering public.

I frequently check the weather channel for the states that I am going to be traveling in and try to plan my route accordingly. I also use the traffic stations that are available at this time for my route planning as I try to avavoid congested areas or go around areas where situations are taking place that will cause me delays or to sit in traffic burning my high dollar fuel and causing more pollution than there already is in the cities.

So, please give this letter your serious consideration.

Thank you,
clifford pinney
